treatments

EXCEPTIONAL

Unbeatable and comprehensive **claims handling services**

Fletchers Accident Management service can help you minimise the hassle and maximize the financial benefits of dealing with your customers motor claims.

Fletchers is one of the UK's leading RTA solicitor firms, with over two decades' experience of working with the insurance industry. We have an outstanding national reputation for motor PI claims generally, motorcycle cases in particular.

Our service is a natural extension of our core legal offering, bringing you a complete set of expert claims management capabilities - covering all types of vehicles, drivers and passengers - direct from the source.

This service includes everything you would expect of an outsourced claims provider, but we also deliver excellent commissions, maximise conversion rates, and offer a range of value-added extras.

Our long experience of handling motor claims means we can quickly see where you may be leaking money, or missing opportunities, in your claims process. So we can help you maximise efficiency - **and maximise your income streams.**

Unbeatable and comprehensive **accident management package**

As well as very attractive referral fees, we offer you the chance to generate significant additional income by offering a legal expenses insurance policy. Our policy, combining excellent cover and benefits, fully underwritten by established insurers in the LEI market.

Our advanced online reporting and case tracking capabilities keep you and your customers fully informed at every stage. We also offer a nationwide hire service (billed directly to third party insurers).

SUCCESSFUL

We can offer so much more
especially what we can claim for

When your customers are protected by the
Fletchers LEI policy we can seek to recover all of
the following on their behalf:

- **Their policy excess**
- **The cost of hire vehicle charges while their own is off the road**
- **The cost of vehicle repair or replacement**
- **Compensation for injuries to insured person and/or passengers**
- **Cost of medical fees and/or specialist treatment**
- **Compensation for damage to clothing or personal belongings**
- **Travel expenses or compensation for loss of transportation**
- **Out of pocket expenses**
- **Lost earnings**

...plus there's the benefits
of our one-stop service

Traditionally the benefits of using a specialist solicitor to handle claims on your customers behalf - competence, proper regulation, quality of service - have been offset by the higher rate of commission and wider range of services offered by accident management firms. Not anymore!

Fletchers Accident Management brings you a complete one-stop service that combines the best of both worlds. By bringing together the full range of skills required to handle motor claims expertly, efficiently and professionally, enabling us to offer excellent commission rates.

If that combination of quality service with top-notch commission appeals, it only gets better. Unlike some accident management companies, we pay all commission on acceptance, not on completion. And we don't claw back referral fees should the claim end up being non-cost-bearing. We can afford to do this because our conversion rates are so high.

In short: we offer you and your customers a better deal without cutting any corners.

INSPIRATIONAL

Fletchers commitment
to claims management services:

- Minimise hassle
